ANX-PR/CL/001-01

LEARNING GUIDE

SUBJECT

93000939 - Statistical modelling

DEGREE PROGRAMME

09AT - Master Universitario En Teoria De La Señal Y Comunicaciones

ACADEMIC YEAR & SEMESTER

2018/19 - Semester 1

Index

Learning guide

1. Description

1.1. Subject details

Name of the subject	93000939 - Statistical modelling
No of credits	3 ECTS
Type	Optional
Academic year ot the programme	First year
Semester of tuition	Semester 1
Tuition period	September-January
Tuition languages	English
Degree programme	09AT - Master universitario en teoria de la señal y comunicaciones
Centre	09 - Escuela Tecnica Superior de Ingenieros de Telecomunicacion
Academic year	2018-19

2. Faculty

2.1. Faculty members with subject teaching role

Name and surname	Office/Room	Email	Tutoring hours *
Pedro Jose Zufiria Zatarain (Subject coordinator)	A-306	pedro.zufiria@upm.es	Tu - 12:00 - 13:00 Additional tutoring hours to be agreed between professor and students.

* The tutoring schedule is indicative and subject to possible changes. Please check tutoring times with the faculty member in charge.

3. Prior knowledge recommended to take the subject

3.1. Recommended (passed) subjects

El plan de estudios Master Universitario en Teoria de la Señal y Comunicaciones no tiene definidas asignaturas previas recomendadas para esta asignatura.

3.2. Other recommended learning outcomes

- The student should have a fundamental undergraduate level knowledge of: 1) linear algebra, 2) mathematical analysis and 3) probability theory.

4. Skills and learning outcomes *

4.1. Skills to be learned

CB06 - Poseer y comprender conocimientos que aporten una base u oportunidad de ser originales en el desarrollo y/o aplicación de ideas, a menudo en un contexto de investigación

CB07 - Que los estudiantes sepan aplicar los conocimientos adquiridos y su capacidad de resolución de problemas en entornos nuevos o poco conocidos dentro de contextos más amplios (o multidisciplinares) relacionados con su área de estudio

CB10 - Que los estudiantes posean las habilidades de aprendizaje que les permitan continuar estudiando de un modo que habrá de ser en gran medida autodirigido o autónomo

CT01 - Capacidad para comprender los contenidos de clases magistrales, conferencias y seminarios en lengua inglesa

CT04 - Capacidad para trabajar de forma efectiva como individuo, organizando y planificando su propio trabajo, de forma independiente o como miembro de un equipo

CT05 - Capacidad para gestionar la información, identificando las fuentes necesarias, los principales tipos de documentos técnicos y científicos, de una manera adecuada y eficiente

4.2. Learning outcomes

RA13 - Capability to construct parameter estimators, hypothesis tests and linear regression models.

RA14 - Capability to model real phenomena using probability theory.

RA15 - Capability to relate the foundations of statistical inference with standard machine learning schemes.

RA12 - Capability to construct probabilistic models from experimental data using inference tools.

* The Learning Guides should reflect the Skills and Learning Outcomes in the same way as indicated in the Degree Verification Memory. For this reason, they have not been translated into English and appear in Spanish.

5. Brief description of the subject and syllabus

5.1. Brief description of the subject

The course covers the fundamental aspects of frequentist statistical inference (parameter estimation, hypothesis tests, linear regression), and their application to solve engineering problems.

In addition, some fundamental aspects of Bayesian inference are also addressed.

Finally, the relationship between statistical inference and some basic machine learning paradigms is also outlined.

5.2. Syllabus

1. Introduction.
   1.1. Engineering and statistical modelling.
   1.2. Course general overview.
2. Review of probability theory.
   2.1. Probability spaces. Conditional probability. Bayes theorem.
   2.2. Discrete and continuous random variables.
   2.3. Joint probability distributions.
3. Descriptive Statistics.
   3.1. Random sampling. Sample mean, median, range and variance.
   3.2. Histograms, blox-plots and time-series graphical representations.
4. Sample distribution and parameter point estimation.
   4.1. Point estimation.
   4.2. Sample distribution and Central Limit Theorem.
   4.3. Unbiased estimators. Variance and mean square error of a point estimator.
   4.4. Frequentist methods of point estimation: method of moments and method of maximum likelihood.
   4.5. Bayesian reasoning. Bayesian point estimation.
5. Statistical intervals.
   5.1. Confidence intervals for the mean and variance of a normal distribution.
   5.2. Confidence intervals for the proportion of a population.
   5.3. Tolerance and prediction intervals.
6. Hypothesis tests for a single sample.
   6.1. Definition of hypothesis tests.
   6.2. Tests for mean and variance of a normal distribution.
   6.3. Tests for a population proportion.
   6.4. Bayesian tests.
7. Linear regression and correlation.
   7.1. Linear simple regression.

7.2. Correlation.

7.3. Linear multiple regression.

8. Towards machine learning fundamental problems and tools.

6. Schedule

6.1. Subject schedule*

Week	Face-to-face classroom activities	Face-to-face laboratory activities	Other face-to-face activities	Assessment activities
1	**Sections 1.1, 1.2 and 2.1 of syllabus.** Duration: 01:30 Lecture **Exercices.** Duration: 00:30 Problem-solving class			
2	**Sections 2.2 and 2.3 of syllabus.** Duration: 01:00 Lecture **Exercices.** Duration: 01:00 Problem-solving class			
3	**Section 3.1 of syllabus.** Duration: 01:30 Lecture **Exercices** Duration: 00:30 Problem-solving class			
4	**Section 3.2 of syllabus.** Duration: 01:30 Lecture **Exercices.** Duration: 00:30 Problem-solving class			**Homework 1.** Individual work Continuous assessment Duration: 05:00
5	**Sections 4.1, 4.2 and 4.3 of syllabus..** Duration: 01:30 Lecture **Exercices.** Duration: 00:30 Problem-solving class			
6	**Section 4.4 of syllabus.** Duration: 01:30 Lecture **Exercices.** Duration: 00:30 Problem-solving class			**Homework 2.** Individual work Continuous assessment Duration: 05:00

7	**Section 5.1 of syllabus.** Duration: 01:30 Lecture **Exercices.** Duration: 00:30 Problem-solving class			
8	**Sections 5.2 and 5.3 of syllabus.** Duration: 01:30 Lecture **Exercices.** Duration: 00:30 Problem-solving class			
9	**Sections 6.1 and 6.2 (part) of syllabus.** Duration: 01:00 Lecture			**Evaluation exam.** Online test Continuous assessment Duration: 01:00
10	**Sections 6.2 and 6.3 of syllabus.** Duration: 01:30 Lecture **Exercices.** Duration: 00:30 Problem-solving class			
11	**Section 6.4 of syllabus..** Duration: 01:30 Lecture **Exercices.** Duration: 00:30 Problem-solving class			**Homework 3.** Individual work Continuous assessment Duration: 05:00
12	**Section 7.1 of syllabus.** Duration: 01:30 Lecture **Exercices.** Duration: 00:30 Problem-solving class			
13	**Sections 7.2 and 7.3 of syllabus.** Duration: 01:00 Lecture **Exercices.** Duration: 01:00 Problem-solving class			
14	**Section 8 of syllabus.** Duration: 01:30 Lecture **Exercices.** Duration: 00:30 Problem-solving class			**Homework 4.** Individual work Continuous assessment Duration: 05:00
15				

16				**Final project.** Individual work Continuous assessment Duration: 15:00
17				**Evaluation exam.** Written test Continuous assessment Duration: 03:00 **Final exam.** Written test Final examination Duration: 04:00

The independent study hours are training activities during which students should spend time on individual study or individual assignments.

Depending on the programme study plan, total values will be calculated according to the ECTS credit unit as 26/27 hours of student face-to-face contact and independent study time.

* The subject schedule is based on a previous theorical planning of the subject plan and might go to through experience some unexpected changes along throughout the academic year.

7. Activities and assessment criteria

7.1. Assessment activities

7.1.1. Continuous assessment

Week	Description	Modality	Type	Duration	Weight	Minimum grade	Evaluated skills
4	Homework 1.	Individual work	No Presential	05:00	7.5%	0 / 10	CT01 CB07 CT04 CT05
6	Homework 2.	Individual work	No Presential	05:00	7.5%	0 / 10	CT05 CB07 CT04
9	Evaluation exam.	Online test	No Presential	01:00	15%	0 / 10	CT01 CB07
11	Homework 3.	Individual work	No Presential	05:00	7.5%	0 / 10	CB07 CT04 CT05
14	Homework 4.	Individual work	No Presential	05:00	7.5%	0 / 10	CB07 CT04 CT05 CB10
16	Final project.	Individual work	No Presential	15:00	35%	0 / 10	CT01 CB07 CB06 CT04 CT05 CB10
17	Evaluation exam.	Written test	Face-to-face	03:00	20%	0 / 10	CT01 CB07 CB06

7.1.2. Final examination

Week	Description	Modality	Type	Duration	Weight	Minimum grade	Evaluated skills
17	Final exam.	Written test	Face-to-face	04:00	100%	5 / 10	CT01 CB07 CB06 CT04 CT05 CB10

7.1.3. Referred (re-sit) examination

No se ha definido la evaluación extraordinaria.

7.2. Assessment criteria

By default, students will be continuously evaluated along the course. Nevertheless, according to the "Normativa de Evaluación de la Universidad Politécnica de Madrid", students can be evaluated via a single final exam whenever they communicate their will to the Secretariat of the Departamento de Señales, Sistemas y Radiocomunicaciones by means of an official request before the deadline of the corresponding academic year. This last option implies the resignation for continuous evaluation.

The course extraordinary evaluation will be carried out via a single exam, independently of the option selected during regular evaluation.

Regular continuous evaluation will be performed as follows:

- Homeworks and proposed classroom exercises (30%). Besides the proposed exercises in class, the professor will propose 6 homeworks to be solved by the students and submitted at the established dates. Such exercises and homeworks will have to be solved using the theoretical foundations and the software tools presented in the course.

- Partial exams. Two exams having, respectively, a weight of 15% and 20% of the final grade. The first exam will cover from Section 1 to Section 5. The second part will cover from Section 5 to Section 8.

- Final Project (35% of final grade).

- The students will be evaluated, by default, via the continuous evaluation procedure. If a student wants to renounce his/her right to continuous evaluation, he/she will have to communicate it to the course

coordinator and the Department Secretarat, before the established deadline. The final proof will evaluate the same skills about the course. Hence, it will make use of the same evaluation techniques than the ones employed

for continuous evaluation (EX, ET, TG, etc.), although the corresponding activities will be concentrated on the evaluations hours and dates approved by the "Junta de Escuela" for the present year and semester.

This alternative final evaluation will represent the 100% of the final grade.

8. Teaching resources

8.1. Teaching resources for the subject

Name	Type	Notes
Douglas C. Montgomery and George C. Runger. Applied Statistics and Probability for Engineers. Fifth Edition. Wiley & Sons.	Bibliography	Fundamental.

9. Other information

9.1. Other information about the subject

The course will be taught in English.

The student will have to work between 26 and 27 hours for each course credit or unit.
